

SafePack

The unique packaging design

SafePack gives:

- ▶ Complete safety
- ▶ Ultimate simplicity
- ▶ Optimum efficiency

SafePack eliminates:

- ▶ Any contact with the product
- ▶ Any chance of a mistake
- ▶ Any product waste

Completely safe and simple to use

Safety

SafePack uses patented technology and an award winning packaging design to deliver the best in safety.

- ▶ SafePack is completely sealed. A safety mechanism in both cap and connector prevent any contact with the product.
- ▶ Because SafePack leaves no waste product, it can be disposed of without rinsing. Eliminating contact with the product.

A. Open the box and place onto the rack

Simplicity

SafePack has been thoughtfully engineered to provide a fail-safe system.

- ▶ The use of colour coding and a product specific "lock and key" connector guarantee no product mix up.
- ▶ The box is easy to open, easy to connect and easy to dispose of when empty. Minimal training is required.

B. Connect using the product specific connector

Efficiency

SafePack uses a simple design and carefully formulated products to deliver the maximum in efficiency and performance.

- ▶ The design of SafePack ensures there is no product waste.
- ▶ SafePack uses the best product formulations to deliver on cleaning performance.
- ▶ SafePack gives significant reduction in waste packaging. The two components can be easily split and recycled.

C. When empty simply disconnect and dispose
